The total tuition and fees listed above assume a student is taking 2 classes per term for Undergraduate programs and 1 class per term for Graduate Programs.

Graduation Rate and Graduation Time

Massachusetts regulations define “graduation rate” as the “number of students who received certificates, diplomas, or degrees in the program during the latest two calendar years, divided by the number of students who were enrolled in the program during the latest two calendar years.” This Massachusetts definition differs from the federal Student Right to Know graduation rate in two respects. First, the federal rate measures the number of students who start a program and then graduate within a certain period of time, while the Massachusetts definition simply compares those who graduated during the period with those enrolled in the program during the same period. Second, the federal Student Right to Know rate includes

only full-time, first-time, undergraduate students seeking a degree or certificate, whereas the Massachusetts definition includes all students in a program for the last two calendar years.

Massachusetts regulations define “graduation time” as the median duration of attendance in months, rounded to the nearest month, of all students who obtained a certificate, diploma, or degree from a program during the latest two calendar years. This number may be different from the normal time to completion that we disclose in our federally required gainful employment disclosures.

Your Loan Debt

You must repay any portion of the money you borrow to pay for this program, including interest, even if you fail to complete or drop out of the program. Failure to repay student loans is likely to have a serious negative effect on your credit, future earnings, and your ability to obtain future student loans.

Loan Nonpayment Statistics

Massachusetts requires schools to disclose a loan nonpayment percentage, defined as the sum of students in the school's most recent federal cohort default rate (covering students who entered repayment between October 1, 2016 and September 30, 2017), additional students in that cohort whose Stafford loans were in deferment or forbearance, and additional students who defaulted under the terms of institutional loans during the period.

As Strayer does not offer institutional loans, below is the percentage comprised of our most recent cohort default rate plus the percentage of students whose Stafford loans were in deferment or forbearance. Please note that the United States Department of Education does not consider students whose Stafford loans are in deferment or forbearance to be in either default or loan delinquency. Federal regulations at 34 C.F.R. §§ 682.210, 682.211, 685.204, and 685.205 permit borrowers to apply for deferment or forbearance, and a school does not make decisions regarding which students qualify. Deferment or forbearance is available for, among others, students who were enrolled at least half time in an eligible postsecondary institution; who qualified for disability rehabilitation, unemployment, or economic hardship deferment; or who qualified for military service or post-active duty student loan deferment.

Strayer University's most recent federal cohort default rate is 11.3%. Additionally, the percentage of students in that cohort whose Stafford Loans are in deferment is 9.65%, and those in forbearance is 30.71%. Thus, as defined by Massachusetts regulations 940 Mass. Code Regs. 31.03 and 31.05(3), 51.66% of Strayer University students defaulted on, or failed to pay, the loans during the 2017 federal fiscal year.

Placement Rates and Employment Statistics

Massachusetts regulations require schools to report placement rates and employment statistics for occupational programs to the extent such rates and statistics are required by federal or state law. The Department of Education and the Middle States Commission on Higher Education, which accredits Strayer University, does not require the University to track and report placement rates.
