

## DISCLOSURES FOR MASSACHUSETTS CONSUMERS AND PROSPECTIVE LEARNERS

The following information is provided in compliance with a Commonwealth of Massachusetts requirement that all proprietary colleges and universities make these disclosures available on their websites.

### COST OF PROGRAM

The total cost of each program is provided in the table below. Prices are estimates using 2020-2021 general program pricing. An individual learner's actual cost may be higher or lower depending upon specialization, transfer credits, tuition discounts and (in FlexPath and doctoral programs) the speed at which the learner moves through the program.

For FlexPath programs, and for the dissertation phase of doctoral programs, the pricing estimate assumes you move at the speed of typical learners who graduated from those programs during the last two calendar years

## GRADUATION RATE AND GRADUATION TIME

Massachusetts regulations define “graduation rate” as the number of students who received certificates, diplomas, or degrees in the program during the latest two calendar years, divided by the number of students who enrolled in the program during the latest two calendar years. Massachusetts regulations define “graduation time” as the median amount duration of attendance in months, rounded to the nearest month, of all students who obtained a certificate, diploma, or degree from a program during the latest two calendar years.

### **YOUR LOAN DEBT**

You must repay money that you borrow as student loans to pay for this program, including interest. You must repay any portion of the money you borrow to pay for this program, even if you fail to complete or drop out of the program. Failure to repay student loans is likely to have a serious negative effect on your credit, future earnings, and your ability to obtain future student loans.

### **LOAN NONPAYMENT STATISTICS**

Massachusetts requires schools to disclose a loan nonpayment percentage, defined as the sum of students in the school's most recent federal cohort default rate (covering students who entered repayment between October 1, 2016 and September 30, 2017), additional students in that cohort whose Stafford Loans were in deferment or forbearance, and additional students who defaulted under the terms of institutional loans.

As Capella does not offer institutional loans, below is the percentage comprised of our most recent cohort default rate plus the percentage of students whose Stafford loans were in deferment or forbearance. Please note that the United States Department of Education does not consider students whose Stafford loans are in deferment or forbearance to be either in default or loan delinquency. Federal regulations 34 C.F.R. §682.210-211 and §685.204-205 permit borrowers to apply for deferment or forbearance, and a school does not make decisions regarding which students qualify. Deferment or forbearance is available for, among others, students who were enrolled at least half time in an eligible postsecondary institution; who qualified for disability rehabilitation, underemployment, or economic hardship deferment; or who qualified for military service or post-active duty student loan deferment.

Capella University's most recent federal cohort default rate is 6.8%. Additionally, the percentage of students in that cohort whose Stafford loans are in deferment is 9.6% and those in forbearance is 19.3%. Thus, as defined by Massachusetts regulations 940 Mass. Code Regs. 31.03 and 31.05(3), 38.5% of Capella University students defaulted on, or failed to repay, their loans during the period 2016-17.

### **PLACEMENT RATES AND EMPLOYMENT STATISTICS**

Massachusetts regulations require schools to report placement rates and employment statistics for occupational programs to the extent such rates and statistics are required by federal or state law. The Department of Education and the Higher Learning Commission, which accredits Capella University, do not require Capella University to track and report placement rates.
